

# MedMind AI

Investor Presentation

## The global AI platform for medical education.

Building what Duolingo is for languages — but for medicine. A complete, multilingual, AI-powered education platform for the world's 23 million medical students and clinicians.

| 08 | Why Now?              |
| 09 | The Team              |
| 10 | The Ask               |

# Medical education is broken

23 million clinicians worldwide lack affordable, high-quality, multilingual learning tools.

## ■ Outdated content

Textbooks go out of date. PubMed publishes 4,000+ studies daily. No existing tool synthesizes live evidence for learners.

## ■ Prohibitive cost

Osmosis costs \$349/yr. Amboss \$199/yr. Anki requires hours of card creation. Students in emerging markets are priced out.

## ■ English-only wall

80%+ of the world's medical students do not learn in English first. No major platform offers native Arabic, Turkish, or Spanish learning.

## ■ Generic AI

ChatGPT gives unverified answers with no citations. Students and clinicians need medically grounded, evidence-backed AI — not a generic chatbot.

# MedMind AI — the complete platform

One platform. Every channel. Every language. Evidence-based.

|                                 |                                                                                                                                                         |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Web Platform<br>medmind.pro     | AI tutor (5 modes) · 125+ clinical modules ·<br>Spaced-repetition flashcards · Drug database · Clinical cases · PubMed live search · Progress analytics |
| Telegram Bot<br>@Medmindpro_bot | Medical AI in Telegram — no signup needed. 10 free messages/day. 5 AI modes. 9 languages. Llama 3.3 free tier, Claude Sonnet for Pro.                   |
| YouTube Channels EN · ES · AR   | 3 auto-generated educational channels with daily Shorts & long-form videos. Organic discovery flywheel at zero CAC.                                     |
| Drug Database 307 drugs         | Dosing, mechanism, interactions, contraindications. Accessible on web and via bot. Growing daily.                                                       |

◆ Key differentiator: the only medical education platform operating across web, Telegram bot, and YouTube simultaneously — in 9 languages.

## 03 · TRACTION

# Built in months. Scaling now.

11,600+

7 languages

125+

Clinical modules  
Structured lessons

307

Drugs in database  
Interactions, dosing

39

Medical specialties  
Full coverage

- **Web platform live** — medmind.pro — full-stack SaaS with AI tutor, flashcards, modules, calculators
- **Telegram bot launched** — @Medmindpro\_bot — 5 AI modes, 9 languages, free tier + Pro
- **3 YouTube channels** — EN, ES, AR — daily auto-generated Shorts and long-form content
- **9 languages** — EN, RU, AR, TR, DE, FR, ES, PT, ID — platform fully localized
- **Drug database** — 307 drugs with dosing, mechanism, interactions, contraindications
- **Module expansion** — 125 modules live, content pipeline generating continuously
- **Mobile app** — React Native Expo — in development
- **WhatsApp bot** — Same MedMind AI experience for WhatsApp — planned Q3 2026

## 04 · MARKET

## A \$6.4B market growing at 18% CAGR

**\$6.4B**

Medical e-learning  
market (2024)  
18% CAGR to 2030

**~23M**

Medical students &  
clinicians  
Global primary  
audience

**\$350+**

Avg annual spend  
on study tools  
Validated willingness  
to pay

**80%+**

Non-English-first  
medical students  
underserved by  
competitors

### Why the market is ready now:

- Claude & Llama 3.3 now rival human medical expert accuracy — enabling reliable AI tutoring at scale
- Telegram reached 1B+ monthly active users — messenger-based education is a proven channel
- Post-COVID: remote learning is normalized in medicine; students expect digital-first tools
- Emerging markets (MENA, LATAM, Southeast Asia) are generating mass medical student cohorts with no local tools

## 5 AI modes. Every learning style covered.

|                   |                                                                                                                 |
|-------------------|-----------------------------------------------------------------------------------------------------------------|
| ■ Tutor           | Explains any medical concept step-by-step. PubMed citations included. Powered by Claude Sonnet.                 |
| ■ Clinical Case   | Interactive case simulation. You play the resident, AI plays the attending. Vitals, labs, decision trees.       |
| ■ Differential Dx | Structured differential diagnosis for any presentation. Can't-miss diagnoses flagged.                           |
| ■ Patient Mode    | Plain-language health explanations for patients and caregivers. No medical jargon.                              |
| ■■ Second Opinion | Reviews any treatment plan against current guidelines. Gives questions to ask your doctor — not medical advice. |

Available on: Web ([medmind.pro](https://medmind.pro)) · Telegram ([@Medmindpro\\_bot](https://t.me/Medmindpro_bot)) · Mobile app (coming Q3 2026)

## 4 revenue streams. SaaS-first.

| Plan       | Price          | Includes                                                | Strategy              |
|------------|----------------|---------------------------------------------------------|-----------------------|
| Free       | \$0            | 5 AI q/day · 8 modules · Basic flashcards               | Top of funnel         |
| Student    | \$15/mo        | 82+ modules · 50 AI q/day · PubMed · Flashcards         | Core revenue tier     |
| <b>Pro</b> | <b>\$40/mo</b> | <b>Unlimited AI · Drug DB · Vet modules · All modes</b> | <b>Primary target</b> |
| Clinic     | \$199/mo       | 10 users · Team analytics · SCORM · Custom modules      | B2B enterprise        |
| Lifetime   | \$299          | Everything in Pro forever                               | One-time payment      |

### Revenue streams:

**B2C Subscriptions** — Student (\$15) + Pro (\$40) monthly recurring revenue

**B2B / Clinic** — \$199/mo for teams — medical schools, clinics, residency programs

**Messenger Bots** — Telegram Pro linked to platform subscription; WhatsApp Q3 2026

**Content Licensing** — API access and white-label for medical institutions and publishers

## 07 · COMPETITIVE ADVANTAGE

# Why MedMind wins

| Feature                  | MedMind | Osmosis    | Amboss   | Anki | ChatGPT       |
|--------------------------|---------|------------|----------|------|---------------|
| PubMed-backed answers    | ■       | ■■ partial | ■        | ■    | ■■ unverified |
| Spaced repetition        | ■       | ■          | ■        | ■    | ■             |
| Clinical case simulation | ■       | ■          | ■        | ■    | ■■ generic    |
| 9+ languages             | ■       | ■          | ■        | ■■   | ■■            |
| Telegram bot             | ■       | ■          | ■        | ■    | ■             |
| Free tier                | ■       | ■          | ■        | ■    | ■             |
| Drug database            | ■       | ■■         | ■        | ■    | ■■            |
| Price (entry)            | \$0     | \$349/yr   | \$199/yr | \$0  | \$0/\$20      |

## Our unfair advantages:

- Omnichannel moat — web + Telegram bot + YouTube + mobile app (no competitor does all four)
- Language-first strategy — deep localization in Arabic, Turkish, Spanish unlocks markets competitors ignore
- Content flywheel — 11,600+ articles and 125 modules create SEO and retention advantages that compound
- Claude AI + live PubMed = highest medical accuracy among consumer AI tools

# The timing window is open — briefly

## ■ AI crossed the medical accuracy threshold

Claude Sonnet and Llama 3.3 now achieve clinician-level accuracy on USMLE benchmarks. This was not true 18 months ago. The window to build with state-of-the-art medical AI is now.

## ■ Telegram reached 1 billion users

The messenger-education category is proven (Duolingo has 1M+ Telegram users). Our bot removes all friction: no download, no signup, no credit card to start.

## ■ Emerging market medical boom

India, MENA, LATAM, and Southeast Asia are producing record numbers of medical graduates with no local digital learning tools. First-mover advantage in Arabic and Turkish is uncontested.

## ■ Category is consolidating

Osmosis was acquired by Elsevier (\$50M+). Amboss raised \$30M. The category is proven. A lean, AI-native challenger can capture significant share before consolidation completes.

# Lean, technical, product-obsessed

MedMind was built by a single technical founder who designed the architecture, built the backend (FastAPI + PostgreSQL + pgvector), the frontend (Next.js 14), the AI pipeline, content generation infrastructure, and all three YouTube channels — from zero to production in under 6 months.

|                     |                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------|
| Founder / CTO       | Full-stack engineering (Python, TypeScript, SQL, Docker), AI systems, product strategy, content pipeline |
| AI & Content        | Automated pipeline generating 100+ articles/day in 9 languages using Claude API with PubMed verification |
| Advisors sought     | Medical content review, clinical validation, regulatory (FDA/CE for future diagnostic tools)             |
| Hiring with funding | 1 × Medical Content Lead, 1 × Growth / Marketing, 1 × Mobile Engineer (React Native)                     |

# Pre-seed round · \$500,000

Seeking capital to accelerate content, distribution, and team.

| Allocation | Amount | Area                  | Usage                                                                        |
|------------|--------|-----------------------|------------------------------------------------------------------------------|
| 40%        | \$200K | Content & AI pipeline | Scale module production to 500+ modules. Arabic & Turkish deep localization. |
| 25%        | \$125K | Team                  | Medical content lead, growth engineer, part-time clinical advisor.           |
| 20%        | \$100K | Marketing & Growth    | SEO, Telegram channel promotion, Arabic/MENA market entry.                   |
| 10%        | \$50K  | Mobile app            | React Native Expo app (iOS + Android). WatermelonDB offline support.         |
| 5%         | \$25K  | Infrastructure        | GPU inference, CDN, monitoring. Scale from 10K to 1M+ requests/day.          |

## 12-month milestones with this funding:

- ✓ 500+ structured clinical modules (from 125 today)
- ✓ Telegram bot: 10,000+ active monthly users
- ✓ Mobile app launched on iOS & Android
- ✓ WhatsApp bot live in MENA market
- ✓ First B2B clinic / medical school contract signed
- ✓ \$15K+ MRR

# MedMind AI

---

## The global AI platform for medical education.

We are building the infrastructure that the next generation of clinicians will train on — multilingual, AI-native, omnichannel, and accessible to the 80% of the world that does not learn medicine in English.
